So why – Our CDM Coordinator Role Services?

"Since the company began, the objective has been to ensure that quality is at the heart of everything we do. Quality in the way we inspect, quality in the way we organise and conduct ourselves and, above all, doing our best to ensure that the client achieves the quality on site they pay for."

It is vital we believe that the role of **CDM Coordinator** is one that warrants in-depth knowledge of the construction process, careful attention to detail, an ethos of assessment and recording of salient information and the desire to ensure that performance and quality are paramount.

All these qualities exist within Veritas Consulting in our daily work and add to our performance as CDM Coordinators.

Our attitude to the role is a practical one – we believe in ensuring paperwork is precise and concise. This helps site operatives and management react more readily. Our emphasis is very much on the practical effects of Health and Safety control, rather than paper for paper's sake.

Veritas Consulting hold individual membership of the Association for Project Safety (APS), (Registered competent CDM Coordinators) as well as the Institution of Occupational Safety and Health (IOSH) complimented, with NEBOSH Qualifications and regular Continued Professional Development.

Veritas Consulting have been successfully carried out the role of **CDM Coordinator** on a wide range of major and minor construction projects. We have the knowledge, experience and resources necessary to ensure successful service delivery to our clients regardless of the size or complexity of the construction project.

Construction Design and Management Regulations

A comprehensive and practical approach to Health and Safety consultancy on Building Projects in connection with the Construction (Design and Management) Regulations and other building related Health and Safety legislation.

KEY CDM COORDINATOR SERVICES

- Advise the client when requested on the competency of designers and contractors
- Ensuring designers compliance with the CDM regulations
- Ensuring that the Health and Safety Executive is notified of all the requisite information relating to the project.
- Ensuring that the Pre Construction information is prepared before arrangements are made for construction.
- Advise as to the suitability of the principal contractor Construction Phase Plan for construction and commissioning of the work.
- When requested to do so, attend progress meetings and provide suitable advice to all parties concerned with CDM and Health and Safety issues on the project.
- Ensure the Project Health and Safety File(s) handed to the client at Practical Completion.

APPROACH

Our senior professional staff are empowered to act in the interest of the company, thus providing clients with a focal point of contact through the entire life-cycle of a project. Their brief involves liaising closely with clients to provide informed advice on all issues relating to CDM and Health and Safety in projects.

PROFESSIONALISM

Veritas Consulting substantial experience in CDM for a wide range of projects ensures:

- Greater insight into CDM regulations and the current ACOP and their application to specific projects.
- Experienced and professional service.
- Practical knowledge of all stages toward the projects.
- Provision of expert and impartial advice.
